### PROJECTS

#### 1. Traveller Symphony - A Travel Booking Platform | 🌐 | 🧑‍💻

JavaScript | RESTful APIs | HTML5 | CSS3 | Git

- Worked with a team of five during Construct Week to create Traveller-Symphony, a user-friendly travel platform.
- Built a website using HTML for structure, CSS for a pleasing look, and JavaScript for interactive features, including integration with the Destination API.
- Used Visual Studio Code for development and GitHub for version control to facilitate smooth collaboration.
- Implemented features like destination exploration, trip planning, interactive maps, and user authentication.
- Implemented secure authentication for user accounts.

#### 2. BayLeaf - Indoor Plants E-commerce Platform | 🌐 | 🧑‍💻

PHP | JavaScript | HTML5 | CSS3 | SQL

- Crafted a responsive e-commerce platform for indoor plants
- Developed server-side logic with PHP to manage customer data, orders, and payments
- Designed and maintained the MySQL database for efficient data storage and retrieval
- Implemented secure transactions by validating customer sessions and preventing unauthorized access

#### 3. Potent Voyage - Responsive portfolio | 🌐 | 🧑‍💻

HTML5 | CSS3

- Collaboratively developed a visually appealing and responsive website using HTML and CSS.
- Showcased skills and design capabilities through a portfolio-based Figma design.
- Led a team of five members to successfully implement the project from conception to deployment.
